Technical Problem Solving

Look for Patterns

— When did you first notice the problem?
— Check basics first: mistyped passwords
— What happens right before and after your attempt to do what you need to do?
— Has anything changed on your computer or with your personal information (i.e. did you recently change your name or install new software or updates?)
— Communicate the evidence clearly (i.e. provide the course and section number, the content area heading, your VUnet ID username, wording of any error messages)
